| <b>Duration</b>    | <b>: 09-JUL-23 to 09-Sep-23.</b>                 |

### **Project Description:**

We developed this project for client **codetru**. To create this project we used **java8** , **spring boot**, **reactjs** and **mysql** database. Let me tell more about employee management system. As we know employees are the backbone of a company and their contribution plays a major role in organization success.

Using Employees Management System we can maintain the records of each employee in a organization.This software allows the administrator to edit employees, add new employees, transfer/promote/terminate employees.
